

CORALPOINT SUSTAINABILITY POLICY

1 Purpose and scope

CoralPoint's business is helping clients deliver the energy transition. Its purpose is to further the fight against climate change by transforming the world's energy systems, so that they are powered overwhelmingly by renewable sources as quickly as possible. CoralPoint aims to run its own operations in a way that is consistent with that work, reducing its environmental impact in proportion to its size.

- **Scope:** This policy applies to all CoralPoint offices, home-workers, client sites and field locations where CoralPoint personnel operate, and to all employees, secondees, interns and contractors.
- **Legal compliance:** CoralPoint complies with the environmental laws that apply in every country where it operates, with UK law, including the waste duty of care, as its Group-wide baseline.
- **Companion policies:** This policy works alongside the Health & Safety / Business Continuity Policy, the Business Engagement Policy and the Modern Slavery Policy.

2 Arrangements

CoralPoint focuses on the few areas where a firm of its size can make a practical difference.

- **Business travel:** Staff travel only when meeting in person adds real value, combine trips where possible, and choose rail over short-haul flights where it is practical.
- **Offices:** CoralPoint uses energy efficiently and, where it controls the supply, chooses renewable electricity. Where it does not, it encourages landlords to do so.
- **Waste and resources:** CoralPoint works paperless by default, recycles where facilities allow, and reuses or responsibly recycles IT equipment at the end of its life.
- **Suppliers:** Environmental performance is considered alongside cost and quality when choosing suppliers, where practicable.
- **Client work:** CoralPoint aims for each engagement to support the energy transition. Under the Business Engagement Policy, CoralPoint will not work with counterparties credibly involved in serious, uncorrected environmental harm.
- **Giving back:** CoralPoint pledges 1% of its global revenues to initiatives that protect the planet and empower people, focusing on the rights of nature, resilient communities, just economies, and conservation and restoration, including coral and reef research.

3 Responsibilities

Sustainability is everyone's responsibility; leadership sets the tone.

- **Board of Directors:** Owns this policy, sets its direction and reviews progress at least annually.
- **Directors & Partners:** Embed this policy within their business streams and lead by example.
- **All staff:** Follow this policy in their day-to-day work and suggest improvements.

4 Review and ownership

This policy is owned by CoralPoint's senior management and will be reviewed at least annually (alongside related policies) and whenever there are significant changes in the business or relevant laws.

- Updates will be communicated to all relevant personnel and business partners.
- Questions about the interpretation or application of this policy should be directed to an appropriate line manager or member of the CoralPoint board of directors.

Approval and Implementation

This Sustainability Policy is approved and adopted by CoralPoint with effect from the date below. All employees, contractors and third parties engaged by CoralPoint are required to comply with it.
